📄 SUMMARY

Final-year Computer Science and Engineering (CSE) student with a strong interest in cybersecurity and hands-on experience in Linux, networking fundamentals, and security tools such as Kali Linux, Nmap, and Wireshark. Familiar with ethical hacking concepts, vulnerability assessment, and web security principles, including the OWASP Top 10. Actively developing skills in penetration testing, bug bounty hunting, and system security through practical labs and Capture The Flag (CTF) challenges. Seeking an opportunity to apply my technical skills and grow as a cybersecurity professional in a professional environment.

📁 PROJECTS

Web Application Vulnerability Assessment,

Conducted vulnerability assessments on test web applications using OWASP ZAP.

- Performed vulnerability scanning on a test web application using OWASP ZAP and identified 5+ security vulnerabilities, including XSS and SQL Injection

02/2026 – 04/2026

Network Traffic Analysis Using Wireshark,

Analyzed network traffic to understand data flow and identify suspicious activities

- Captured and analyzed 500+ network packets in a virtualized environment using Wireshark
- Detected suspicious traffic patterns and analyzed multiple protocols including HTTP, TCP, and DNS using Wireshark
- Applied packet filtering techniques to isolate suspicious network activities and improve traffic analysis accuracy
